

# RESCUE+

## FREEDOM PROJECT

Chi Chi was rescued from the Korean Meat Trade in 2016.

The **Rescue + Freedom Project (R+FP)** is a U.S. based non-profit organization dedicated to rescuing survivors of unique captivity and cruelty and telling their emotionally compelling stories to prompt social change and celebrate a rescue lifestyle.

Since 2010, R+FP has been freeing survivors from laboratory experiments, senior and special needs animals from shelters, and victims of horrific abuse from around the world.

No matter what the condition, the location, or the expense, the Rescue + Freedom Project team is ready to rescue.

# RESCUE. REHAB. REPEAT.

RESCUEFREEDOMPROJECT.ORG

## *What kinds of animals does R+FP rescue?*

All kinds from big and small, to paws and hooves! Beagles rescued from laboratory experiments make up the majority of the animals rescued, as R+FP (formerly Beagle Freedom Project), is the global leader in the rescue of animals from research.

R+FP has also had the privilege of rescuing cats, rabbits, guinea pigs, goats, horses, ferrets, mice, rats, and even goldfish from laboratories in many states and countries.

R+FP has taken in scores of dogs from the Chinese meat trade, special cases of deprived abuse in countries like Iran and Lebanon, as well as special needs and senior/hospice dogs and cats languishing in the U.S. shelter system.

## *How can I help?*

- + Knowledge is power! Learn about the issues. The R+FP survivors are public awareness ambassadors who challenge us to re-examine all conditions of caged cruelty.
- + Foster and Adopt! These amazing rescues can only happen if there is a network of families that will open their homes and their hearts to those in need.
- + Go Cruelty-Free! Download R+FP's free smartphone app "Cruelty-Cutter" and be a conscientious consumer.
- + Donate! R+FP is a non-profit organization and we stretch every dollar to help as many special needs animals as possible.

We empty the cages. You fill your homes.  
Together we change the world.
